

SUGSS MEETING 2019

LOOP BYPASS FROM THE
LEADERS IN THE FIELD

SUGSS Principal Sponsor
Sydney Upper GI
Surgical Society
Medtronic
Further, Together

SATURDAY 16 NOVEMBER 2019
INTERCONTINENTAL SYDNEY, DOUBLE BAY, AUSTRALIA

<i>Morning session</i> 0830 - 1020	Program	
0730-0830	Registration Opens	
	International Trends in Bariatric Surgery	
0830-0840	President's Welcome – David Martin	5+ mins
0840-0845	Carolyn Jameson - Australasian trends in bariatric surgery. Why have band numbers fallen so far?	5 mins
0845-0850	WJ Lee – Bariatric surgery in the Asian Century.	5 mins
0850-0855	Dan Cottam – what is happening in the US and what drives the trends.	5 mins
0855-0900	KS Kular – what is happening in India.	5 mins
0900-0905	Craig Taylor – Why the sleeve is the new gold standard – the numbers talk for themselves.	5 mins
0905-0910	David Martin - Going with the flow. Moving from a sleeve predominant to bypass predominant practice.	5 mins
0910-0915	Adam Skidmore - The loops are witchcraft. A Roux bypass is still the life of the party. It does the same job and we know the long-term problems.	5 mins
0915-0920	Michael Talbot – The Fixed ring RYGB has few friends but is in fact the gold standard.	5 mins
0920-0940	WJ Lee – A legacy of multiple sentinel randomised controlled trials. Who gets which operation in my current practice?	20 mins
0940-0955	D Cottam – Selection. Who gets what - and why the SADI, despite sitting alone at lunch time, is the best operation.	15 mins
0955-1020	Panel Discussion	25 mins discussion

1020 - 1050	Morning Tea	
Brunch session 1050 - 1240	Early Results. Late Toxicity	
	How do we get the balance between effectiveness and complications right?	
1050-1110	WJ Lee - How to create & tailor the best bypass for the patient. Small bowel length? What long terms problems occur despite best care.	20 mins
1110-1125	Dan Cottam - How to create & tailor the best SADI for the patient. What long terms problems occur despite best care.	15 mins
1125-1133	Jason Free - SADI/SIPS/Loop DS. What's in a name? What I do, success and speed bumps in introducing Loop DS into my practice.	8 mins
1133-1141	Hisham Hammodat - The standard Duodenal Switch is just fine. Safety and efficacy in NZ and the world.	8 mins
1141-1201	Panel Discussion	20 mins
	Anatomic variations in primary and revision surgery	
1209-1214	Michael Talbot - Hiatus hernia is important for all these surgeries.	5 mins
1214-1219	George Hopkins – “I could be playing tennis” Why Hiatus Hernia is mostly unimportant.	5 mins
1219-1224	Ruth Blackham - Sleeve and Pouch volume. Is it important in revisions?	5 mins
1224-1230	Wendy Brown - Small bowel exclusion. How to determine what is appropriate in revision surgery for inadequate weight loss and why do I always get the hardest topics?	6 mins
1230-1240	Panel Discussion	20 mins
1240-1340	Lunch	
1340-1500	Video Session – Step by Step	
1340-1350	KS Kular – 12 years of OAGB - The primary bypass that suits my patient cohort (Including video).	10 mins
1350-1354	Brendon Ryan – Revision band to OAGB. Single stage.	4 mins
1354-1358	Craig Taylor – Sleeve to OAGB.	4 mins
1358-1402	Reza Adib – Sleeve to RYGB & Including the Annual SUGSS Reza Adib Oration.	4 mins
1402-1406	Jorrie Jordaan – Sleeve to SADI.	4 mins
1406-1410	David Martin – Incidental Hiatus hernia during bypass.	4 mins
1410-1415	Ian Martin – Robotic Incisional Hernia Repair from inside the hernia with fascial transposition.	5 mins
1415-1425	WJ Lee – OAGB creation in revision patients and differing scenarios.	10 mins
1425-1435	Dan Cottam – SADI creation in revision patients and differing scenarios.	10 mins
1435-1500	Panel Discussion	25 mins
	SUGSS Annual Medtronic Prize Paper Final Selection	

1500-1505	5 mins prize paper 1	4 mins with 1 min discussion
1505-1510	5 mins prize paper 2	
1510-1515	5 mins prize paper 3	
1515-1520	5 mins prize paper 4	
1520-1550	Afternoon Tea	
	Last Session	
1550-1705	Something different - The Complexities of Surgical Life - where have I gone right and wrong and some other stuff outside the box.	
1550-1558	Senarath Werapitiya - Making OAGB work in a rural centre. How I tailor my technique & patient management now to maximise outcomes and minimise problems.	8 mins
1558-1603	Nick Williams - I used to love the OAGB but now not so much.	5 mins
1603-1613	KS Kular - Managing weight regain in OAGB & any role for surgery?	10 mins
1613-1618	Henry Hook - Managing CBD stones after long limb bypass & SADI and Implications for practice.	5 mins
1618-1628	Robert Goldman - taking the extra step. Post bariatric body reconstruction & contouring. What it means for our patients and what I do.	10 mins
1628-1638	Charbel Sandroussi - Academic surgery in Australia. Does it exist?	10 mins
1638-1648	Ian Martin - There's more to Life than Work. Tales of big waves, angry sharks, kitesurfing, back country snow cliffs and adventure racing.	10 mins
1648-1658	WJ Lee - Where is China & Chinese Surgery headed in the 20-30 years – Views from Taiwan.	10 mins
1658-1705	Closing Remarks from the President – Michael Talbot	5+ mins

Join us for drinks and canapes to close the Meeting!

Where: Meeting foyer of the InterContinental Hotel **Time:** Immediately after the Meeting closes
